

Question: The Bible speaks of the “law of sin and death” and the “Law of Spirit and Life.” How can there be two laws if there is one God, and God is Law?

Answer: The word “**law**” -- used in the proper context of both of these references -- means “**way**.” The “law” of the creation of life forms is a law that **never changes**. Earthly life forms and their nature change, but the **One God** who is the Creator of all life forms is **Infinite Mind and does not change**. **The one Life Source of every form is One Spirit** that operates by **One Law**. The “way” of life and the existence of each individual life form varies in the manner it expresses itself according to the **nature** of the form. **But the Law of the Spirit and the way of creation of every life form is the same and does not change**. The Universal Law of the creation of life forms is that every kind of life form is conceived and formed in the body of another life form of its kind, and when it is fully formed it is born into the kingdom and the way of life that is consistent with its nature and its existence.

There is much controversy concerning the subject of evolution and creation. One would need to deny that the bodily form of a man or a tree evolves out of a seed of its kind if he would deny or discount the evolution of forms. He would also need to deny the presence of Intelligent Life working in and creating the form through the substance of the seed, using the elements of the earth and the heavens to fashion the form as it grows, evolves, and develops. To accept either creation or evolution as Truth is not to deny the other, since neither could produce a form of itself. Without the seed -- out of which to create a form -- Spirit would have no substance in which to infuse the Life and intelligence needed by which to create a form. Likewise, without the Intelligent Life Force within the seed there would be no increase of substance by which to fashion a form.

The One Law has two arms that work together, **but it is One Law**. There are many and various “kinds” of life forms, and there are equally as many “ways” that Life expresses Itself in and through a form. The “way” Life expresses Itself in a form belonging to the mineral kingdom (kind) is not the same “way” Life expresses Itself in a form that is born, lives, and has being in the vegetation kind of form.

In the earthly realm, there are presently life forms that are divided into four kingdoms. Each of the four kingdoms has living and existing within it many and various types of life forms. Because many of the life forms are of a different nature, each form is born into the kind of atmosphere and environment that is compatible with its nature. The “way” Life expresses Herself through different kinds of forms changes according to the kind of form, **but the Life Essence that expresses through every kind of form never changes**. Only that which does not change can be counted as Law!

The invisible magnetic field that envelops each individual earthly life form is the “place” where all visible life forms exist and have their being. The degree to which a life form is “conscious” is measured by the “rate” of the vibration of Life **“in it.” Every kind of form is conscious on the plane of its being**. The “field” around the form is fully conscious. It is the place where the invisible, spiritual intelligent life forms that create the outer visible forms work and abide. **Consciousness** is the glue that holds together the elements and the substance of the creation. Therefore there could be no creation of a form of any kind, were there not the **“Presence of Infinite Wisdom”** in the field doing the work of creation by using the invisible substance of the bodies of intelligent life forms.

The prescribed elements in the substance that is used for the creation of every life form are mixed and compounded together in order to fashion each form according to the kind and nature of the Seed (Atom). Afterward, the Atom’s body is the form that evolved out of the substance of the Seed that is in him.

All life forms are conscious on the level of their existence, but all do not have a “brain.” Only those life forms that are animate and are made of **“flesh matter”** have a brain which “Mind” operates through.

There are four kinds of flesh and “Mind” matter in the earth’s realms: fish, fowl, beast, and man. As the body of a life form evolves from one form to another, the rate of the vibration of Life in and around the form increases. The degree and measure of the rate of increase depends upon the kind of life form it is. As the rate of the vibration of Life in the form increases during the evolutionary process, the consciousness in and of the form also expands, whether the form is animate or inanimate.

Every kind of “seed” holds within itself many different types of forms. For example, an apple seed holds within itself a root; a tree body with its bark, branches, leaves, and blossoms; and lastly the fruit -- wherein are other seed of its own kind. These forms do not include the heart and all of the other inner parts of the tree that are unseen. Each of these parts has many and various shapes and sizes, and none of them have the same outer appearance. Nevertheless they are all of the one self-same Seed (Atom).

Every kind of life form, like the seed, holds within itself many other bodies of various shapes, sizes, and types. The original “Seed” (Atom) out of which the “man-kind” of life form was created and has evolved also holds within it many forms having different shapes, sizes, and colors. Likewise, the seed of a man, out of which the body of a man evolves, holds within it the many and varied members of the one body. Each of the body’s many organs are made of a different type of cell matter, and each has a different shape and function in the “one body” -- but all evolve out of the “one cell amoeba” (worm) that was the genesis of the form.

Since there are many parts, but all are one, we cannot say to one of the many parts, “We have no need of you,” unless we say to the whole body, “We have no need of you.” Therefore the Spirit -- Who is present without the form, and Who is the Conscious, intelligent Life within the form, and the Creator of it -- cannot say to the form, “I have no need of you.” Otherwise, He who is the Consciousness and the very being and the Life of the form -- ***existing within and without the form -- cannot fully manifest Himself and His true Nature as He really is.*** And similarly, the bodily form that grows and evolves out of the “Invisible Word of the Wisdom of God” cannot say to its Creator who is the Source of its being, “I have no need of you.”

Held within the Seed that is within the bodily form of a human being is the essence of his original root, which is the first Atom called the “Word of God (Wisdom).” Out of the root of the original “Seed” -- which was in the beginning with God and was God, and Who was the genesis of the development and evolution of the body of a man -- ***will emerge the perfect God-kind of Life form. This is the way the Universal Law of Spirit and Life works*** in order that the Formless Word may fully express Itself in a complete and whole bodily form. ***It is also the purpose for which the bodily form of a man was created.***

Every part of a man’s body evolves from one type of form to another until every part is perfectly formed and completely developed and mature. As the body “evolves” and changes from glory to glory, the consciousness and light of mind also ***expands*** until the mind is fully “enlightened.” When the body and the mind of a human life form have reached full maturity, both the body and the mind are fully developed, fully awake, and alive ***while yet existing in the third dimension.*** Afterward, the “God kind” of Seed that is inherent within him will be quickened -- and the “God kind of bodily form” will begin to emerge from within the human life form. A new kind of Life form that is inherent in the Seed of the last generation of the first Atom (Son of God) -- that was in the beginning pure, intelligent Light and Sound (Spirit) -- will be resurrected to newness of life. The last generation and bodily form to be raised up out of the root of the first Atom will be transformed into an incorruptible Life form. This is the body will be quickened and made immortal.

During His many earthly experiences, the “creature” evolves (is raised up) out of the root of the same Seed (Word / Name) and takes upon Himself numerous kinds of earthly life forms over eons of time.

Each new life form and its flower -- *like the lilies of the field* -- is created in its own order and in its own time and season out of the substance of the same root who first descended deep into the earth out of the original living Seed (Word).

An example of this is a tree. It is formed in the order that each part of the tree grows and adds its part and its form to the growth and formation of the “whole tree” that begins with a single seed. First comes the root out of the seed -- through which the whole tree is formed and which is the foundation and the life source of the whole body of the tree.

The foundation that is the root of the human race was laid in the earth at the beginning of the creation of the body of a human being. The heavenly Atom held within Himself the form of a human body when He first descended into the lower regions and wrapped Himself in a form of earthy substance (dust). A form that was in the likeness of a human body was “*in the Word (Atom)*” that was in the beginning a God Seed (a Spirit). He has a Name, He is of Divine Nature, and he is one of a kind, although in Him is the life and consciousness of every “kind.” At the end of the evolutionary process, when all parts of the body are fully formed and fully developed, their Creator will join all the parts together in one body and completely “immerse” Himself in it -- and forever be “one” with His creation.

When one places a sponge in a pail of water, for example, the sponge becomes “wet” as it is filled with the water -- and at the same time, *the water takes on the “form” of the substance of the sponge.* Likewise, when the body is fully formed, whole, and complete in every way, at the appointed time it will be filled with the Spirit, the Life, and the Nature of its Maker, and its Maker will be the Life and Consciousness of the *one bodily form of His creation. Like the water and the sponge, the body (sponge) will then be the bodily form of Spirit (water).* Divine Nature, Consciousness of Mind, and the way of Life that were in the beginning *Spirit without physical form* -- are now able to fully manifest in a physical bodily form.

The descent of the Atom, who is a Spiritual Life form (a Son / Seed of God), and the planting of Himself in the earth, and the creation and evolution of one bodily form out of another in time and space -- all of this was a “God idea.” It is for the pleasure and the purpose of the “*One*” whose idea it was and is that the work of creation and the evolution of forms through the Substance of His Word (Himself) is accomplished. The creation of sentient life forms is the work of the Law of Spirit and Life within Infinite Mind, and at the same time working outside the bodily form in the magnetic field where the body is anchored, lives, moves, and has being.

Every Atom who ever took upon himself an earthly form descended into the earth’s atmosphere from a Star system. Atoms are invisible sun rays. They are the Light of Life and they are living, intelligent Spiritual Beings *whose bodies are made of the Substance of Fire, Cosmic Mind Matter, and Light.* There are different types of Atoms in the body of the universe, in the same way that there are different kinds of cells in the body of a human being.

A human body is a “miniature universe” consisting of many and various kinds of living bodies and body parts. A fully formed human body is composed of all the different kinds of elements of the earth, therefore it embodies the essence of all the kingdoms of the earth. *A fully mature member of the human race is one of a kind, yet he embodies all other earthly kinds of life forms.*

Every Star is different, the one from the other, and therefore their children are all different. Atoms are “*descendants*” of the Stars, and the bodily form of a man is the “*ascendant*” of a single Atom. An Atom is a Spiritual Seed, and every seed has his own body. He who first descended into the earth without a

physical, bodily form *will in the end ascend into heaven in a glorious, immortal, and perfect bodily form* created by the Spirit and the Mind of Infinite Wisdom using the science of physics and chemistry.

There is one Life, one Spirit, and one Mind that operates and expresses Itself in and through innumerable life forms and in a multitude of ways. Spirit, Life, and Mind are *one*, and manifest as *“Consciousness.”* *Consciousness is called “God.”* There is no place that Consciousness is not. Consciousness is that which *“IS”* -- and out of which all “things” that have being have come, and in which all “things” move, live, and have being. Whether a “thing” is animate or inanimate, or whether it has “physical form” or “Mind form,” it is all Consciousness -- and Consciousness is God.

The name “God” means “good.” Since Consciousness is Spirit, and Spirit is Life, then there is only Life, and Life is God and God is good. There is no “death” -- nor could there be -- since God is everywhere present and God is Life. There is, however, the “appearance” of death when the Spirit departs the body and the body becomes inanimate and the form dissolves back into the dust. But there could not even be the existence of “dust” if there were not the “Presence” of Life (Consciousness) in and around it -- for it is the “Presence” that is very existence Itself.

Ephesians 3:19 says, “And to *know* the love of Christ, which passeth knowledge, that ye might be filled with all the fullness of God.” To *know* the Love of Christ is to be conscious of Life and to know the Wisdom of Truth. Christ is God and God is Truth. The “Love” of Christ is the fruit that is the manifestation of the Spirit, the Life, and the Power of the Word and the Wisdom of God in a bodily form.

When one receives the spiritual gift of the Word (Pearl) of Wisdom (the heavenly Atom), and he diligently watches over it and brings forth out of it a living Tree of Wisdom called Christ -- and he continues on in his labor of Love to bring forth the fruit and the Substance of Life called Love -- he will be able to receive the Knowledge of the Holy, which is Understanding. This high order of Truth and Understanding is the Knowledge and the Wisdom of the *“Law of the Spirit and Life.”* When one is Conscious on this plane of Life and he continually lives and exists in a physical bodily form, *then “she, the body which is the temple of God,”* is filled with all the fullness of God.

God is Truth. The increase of Truth is the Substance of Spirit, Life, and Mind -- and God is the Consciousness of that Mind. When an individualized form of the Living Substance of Truth is perfectly formed and fully Conscious, he is fully God incarnate. He is the Law and the Way of Spirit and Life in bodily form. This is the plan of the Eternal Spirit for all men: *“that they might be filled with all the fullness of God.”*
