

Changing the Molecular Structure of the Body

In order to change the molecular structure of the body of a man, one must change the composition of all the particles, elements, and molecules that make up the body's electrical grid, its mechanical parts, and the body mass. The weaving of the nerve system through the body mass must be restructured and repositioned in such a way that the electrons within the atoms which make up the molecules, cells, etc, can increase their orbital speed. The electrons in the body structure must move (vibrate) at the speed of light in order to transmute or transform the molecular structure of the body.

In order to change the molecular structure of the body, the body matter must be reformulated. Atoms are composed of electrons, protons, and neutrons. A molecule is the smallest particle of a substance that retains the properties of the substance and is composed of one or more atoms. The electron in the body of the atom is the life of the atom and molecule, and the electrons determine the rate of the vibration of Life in the bodily form.

The composition of the body matter of an earthly man is not the same as the composition of a spiritual body. In order for the body matter of an earthly man to be changed into spiritual Substance there must be a complete transformation of the molecular structure of the whole man. This is accomplished by first changing the content of the mind -- which will change the composition of the mind matter. In order to change the composition of the mind matter and renew or make new the consciousness of the mind, one must partake of Divine Wisdom and Knowledge. The composition of the substance of the molecular structure of the body is determined by the content of the mind. The information that the mind is conscious of determines the composition of the substance of the mind matter, and thereby the structure of the body.

There are more atoms / electrons in the composition of Cosmic / Spiritual Mind Substance than there are in earthly flesh mind matter. Therefore there is a stronger electrical current running throughout the structure of the new man (Mind, Soul, and body) than the current running through the body of the earthly man. The more Fire (electrons) there are in Spiritual Mind Matter, the less water (flesh matter) is present. The less "water" (flesh) there is, the less weighty the body mass is. The greater the measure of Light and consciousness of mind, and the higher the quality of the knowledge one is conscious of, the higher the number of electrons there are in each molecule of the mind and in the body's structure. As the "*mind*" and "*consciousness of mind*" is -- so is the whole body. The body of a man and the "planet or planets" (organs) he embodies all evolve and operate by the same Universal Law.

All planets in the earth's solar system (including those in men's bodies), and every planet in other solar systems in all the outer worlds and in our universe are affected by any orbital change in the system. We are now approaching the end of the present orbital cycle called "the Great Cycle Orbit." The end of this cycle also ends the Piscean Age (a 26,000 year cycle). In addition, we are also at the end of a shorter cycle of 6,000 years -- a cycle within the 26,000-year cycle. It takes 206 million years for our galaxy to orbit or revolve around the Grand Central Sun. We understand that there are cycles within cycles, counting down as far as you wish to go, even to the very last second on the clock.

Our solar system was created over four billion, five hundred and thirty two million years ago. This means that the end of this present Great Cycle Orbit around the Grand Central Sun that took 206 million years to complete is the end of the 22nd orbit of our Milky Way Galaxy around the Grand Central Sun.

The last 6,000-year cycle within the Piscean Age began approximately 4,000 years B.C. when the last scientific treatise was given to mankind to assist him in the final stages of development of his bodies and

the finishing of his earthly work. We are now in the “seventh day,” which is the “Day of the Lord (Spirit)” when man must cease from his works. We have described here timeframes of millions of years and thousands of years, and now we have come to the absolute end of the 6,000 years of time that man was given to work by the scientific treatise (religious writings) to develop his body (senses) and his mind. The New Testament writings were given to man to help him finish and cease from his earthly works and enter into his rest, as he was promised.

The Lord’s Day is the seventh day of the week, which we are now in. It is the Day that the Father will finish the work that He began in the beginning. It is the Day of the pouring out of the Fire -- the scourging and quickening -- to make incorrupt and immortal the house that man has built. This house has been in construction for more than four billion, five hundred and thirty two million years.

The Aquarian Age began its overlap time and preparation for the new Cycle Orbit on November 20th of 1994. November is the ninth month of the Jewish calendar. The overlap time is the last hour of the day when man must finish his work and report to the paymaster to receive his reward. He will receive his reward according to the deeds he has done in the body. If he has made his house acceptable to the Lord, it will be immortalized and he will enter his reward: eternal Life in the body. If he has not completed the house and it is unacceptable, he will remain a servant and he will receive a servant’s pay according to his works.

At the end of the “overlap” time between the two dispensations (the Piscean and Aquarian Ages), and before the new Great Cycle Orbit begins, all orbiting systems must *STOP turning and stand still -- and all systems within the Cycle Orbit, whether bodies of men or other kinds of forms, must reverse their orbital direction.*

At the end of each Great Cycle Orbit of 206 million years, the entire orbiting system must reverse its orbital direction, from clockwise to counterclockwise or vice versa. The present new cycle begins the 23rd Great Cycle Orbit of our Milky Way Galaxy around the Grand Central Sun in the center of the universe, and the new Cycle Orbit will travel counterclockwise. At the end of the 23rd cycle of 206 million years, once again, the entire orbiting system must reverse its orbital direction back to clockwise.

This new orbital direction will occur at a higher wind velocity and a greater watt and frequency level. The rate (speed) of the vibration of the electrons (atoms) in the earth’s new solar system and the vibrational rate of all planets within the system will also increase in order to compensate for (or be compatible with) the higher watt level and frequency.

The Grand Central Sun will reverse its position in the “unit” (One) *by two degrees* when the orbital direction of the system is reversed and the movement and rotation of the new orbit begins. The Sun does not “orbit,” but does change the direction of his face by two degrees on the magnetic needle (compass) every 206 million years. This two-degree backward change in the Central Sun’s position will decrease the temperature in the whole system by two degrees. This will create an “ice age” during the next “*dispensation of time*” during the Aquarian Age.

It would be impossible for planet earth and all who dwell upon the earth to remain in the earth’s solar system unless the earth and its inhabitants evolve into the fourth dimension of Life before the whole system completes its present rotational orbit in order to begin the next cycle in the opposite direction. Every living thing in this solar system and all other systems in the universe must evolve together in an orderly fashion, keeping order and balance in the operation of all the systems. All parts of the system must be in agreement and maintain harmony.

The changes will not happen on the earth plane all at once, but the changes will continue throughout the entire overlap time that we are now in and have been in since November 20, 1994. There is much work that we must accomplish during the overlap time to prepare the earth and her inhabitants for these great changes. We must quickly inform heads of states and leaders of nations so that they can begin to prepare the people for the coming changes in the world's systems and prepare for the new world order. Otherwise, billions of earthlings will perish during the coming years. ***Mother earth "will" rid herself of all entities whose life depends upon her provisions who will not first prepare themselves and then begin immediately to help others to prepare for this awesome event.*** Every living creature that dwells upon the earth and operates in this solar system -- and therefore every creature in the entire universe -- will experience this evolutionary change in their minds and in their bodies in the very near future.

The "Elect" Sons of God who are now ready to manifest upon the earth must quickly gather together unimpeachable, undeniable, and unquestionable proof of the end of this age and the beginning of the new world order to present to leaders all over the world! Those heads of state and heads of nations who refuse to accept this Truth and prepare the people whom they govern *will quickly be removed and replaced by the intervention of the Light workers (the Elect of God).*

A galaxy (and its sub-parts) can only travel or revolve clockwise or counterclockwise for 206 million years without reversing its rotational direction, because if it did not reverse direction it would either burn up or freeze (depending on the direction of the rotation), and the whole system would disintegrate. Divine Universal Cosmic Mind oversees and determines the functions of not just the universes and the galaxies and solar systems, but also the functions and progress (or lack of it) of each planetary body within them. *This includes watching over each incarnate on every planet in the system.*

In order for an individual to pass from the third dimension of Life into the fourth dimension of Life, he must raise his level of consciousness to Cosmic Christ Consciousness. At that time, he will be initiated into the "Christhood," sometimes called "the White Brotherhood -- the Ascended Masters State."

Consciousness of pure Spiritual Knowledge will facilitate the transmutation of one's body and provide the state of mind that must be obtained before one can make the necessary changes in the molecular structure of his body. The composition of the mind and the body's substance must be changed in order for the physical body to ascend upon a higher plane of existence, thereby having a stronger and a longer frequency range.

"Transmutation" means "to change or alter in form, appearance, or nature, and especially to a higher form -- *to subject the body's elements and composition to transmutation.*" Transmutation means the conversion of one element or nuclide into another, either naturally or artificially. Converting or transforming the composition of the body's flesh matter into living Spiritual Substance is performed by intelligent, fiery Beings of Light that are "Light rays." These Light rays are invisible, immortal, living bodily forms of *pure, incorruptible Intelligent Life.* They are Elements (Lords) of Fire. They are living bodily forms of the "formless" Anti-Matter; they are *"that Spirit."*

No one can obtain eternal Life in an earthly, bodily form except or unless he receives and embodies Knowledge on a Higher Order of Life. This Knowledge is pure and it is holy. It is the Knowledge of God and it is Understanding of the Law of Spirit and Life.

No one can live by a law that he does not understand. The natural mind of an earthly man cannot receive and understand Knowledge on a Higher Order of Life. ***Therefore the mind must first be renewed, and afterward the molecular structure of the body will be changed by the operation of the Spirit of Wisdom***

through the Knowledge of God! This is the only way to obtain eternal Life in an immortal planetary body.
