

## The Language of the Spirits and the Tongues of Angels

The “language of the spirits” is the voice of the ascended mineral kind of life form, and the “tongues of angels” are the voice of the ascended heavenly “Light rays.” After God’s “Word” was first spoken and after the seeds were all planted and the first generation of seed was quickened and formed, the first to be born through the body of mother earth were minerals -- out of which came rocks, gold, silver, iron, etc. and all manner of precious stones. The second kind of bodily forms the earth bore were the many and various kinds of vegetation. Then came the fish, the fowl, creeping things, the beasts, and man.

Every kind of life form communicates with every other kind of life form, either on a conscious or unconscious level, by sound of voice (vibration) or by “mental” exercise. Each kind of life form has a language and a measure of consciousness all its own, from the first generation to the last (the alpha to the omega). While every form of creation has a measure of consciousness, only those who are born of “flesh” have *light of mind*.

One who possesses the Mind that knows and understands the language of spirits and angels knows the language of every other kind of life form, and he is able to consciously and freely communicate with all of them. The language of the spirits is communicated through the Consciousness of Cosmic Mind.

Every kind of life form -- except mankind in his present undeveloped state -- recognizes the presence of Life and the authority of Spirit within itself and others. Each kind of form lives by the law of its own nature. Higher and more fully developed life forms bear rule over the lower kind. The elder forms of life are the lower kind and serve the younger, higher forms in the same way that the “body” (feet) serves the head. Lower states of consciousness in older life forms ascend through the bodies of the younger generations, giving them their strength, light, and Life Force. The vegetation kind of life forms are a younger and higher evolved generation of the minerals than the first generation. The vegetation life forms embody the strength of the elder generations of mineral life forms -- and both the elder and the younger ascend through the bodies of the flesh and the blood of fish, fowl, creeping things, beasts, and man.

The human life form is the youngest ascendant of the mineral life forms; man’s kind of mind and flesh matter is also the youngest of the other three kinds of earthly flesh matter. The molecular structure of man’s flesh matter, however, will be changed (born again) before he enters the “Kingdom of God.” “Corruption must put on incorruption and mortality must put on immortality” before a man’s body can ascend through and beyond the fourth dimension.

The body of a fully formed, fully developed, and fully mature man embodies all parts of the lower kinds (kingdoms) of earthly life forms. Elements of all kinds of earthly life forms *live in and upon* the living body of a man who comes into the fullness of the Knowledge of the Son of God unto the *measure* (number) and the *stature* (height) of a perfect (or complete) man.

The elders (mineral life forms) ascend through and serve the body in the form of the electrical or nervous system of the body, and this electrical system gives vitality and life to the whole body -- whether the bodily forms are animate bodies of flesh, or inanimate rocks, vegetation, etc. The minerals and their mates (the Light rays / vitamins) are the life and vitality of the body and soul of the earth mother -- and all of her children -- at every state of their evolution. The two counterparts of the mineral kinds (kingdom) of life forms are Pure, Intelligent Spirit -- and Life / electrons / Anti-Matter. All earthly life forms who are members of each of the kingdoms of the earth are conceived, created, formed and sustained by *the elders* - - who are members belonging to the mineral kingdom.

Pure, Intelligent Life is Anti-Matter. Anti-Matter is anti-Christ. Christ is the “Light” of the sun whose rays give Life to all flesh matter and all other kinds of life forms. The bodies of the first earthly generation of Anti-Matter are living, microscopic minerals who are children of the night; they abide in the *darkness of the earth*. The sun’s rays provide warmth to the earth and her children.

The Light rays hold in them the various types of “*vitamins*,” i.e. A, B, C, D, E, K -- and they (these letters) are companions of the minerals (elementals). Every letter in the alphabet has been used to name the many kinds of mineral life forms; they have also been used to name the many forms of vegetation and other kinds of life forms. The mineral elementals took upon themselves the name, number, and “tone” (vibration / musical note) of their “*vitamin*” counterparts.

Deep inside the body of the earth (mother) it is cold, dark and clammy (damp), so the life sustaining minerals (elements) live in her body near and upon the earth’s surface where the temperature is warm. They ascend out of the center of the earth (fire / hell) where they are born out of the molten rock. ***Their nature is heat / fire.*** Their journey from their birthplace to the earth’s surface is very long, cold and arduous, but their only chance of meeting their “savior” and their soul mate, the Light ray, is to make the upward journey to the surface (open womb) of their mother’s body (earth).

The temperature in the magnetic field around the earth is controlled by the heat from above and the cold beneath the earth’s surface. These are the “north” (hot) and south (cold) poles, the reverse of man’s magnetic poles. Changing the magnetic poles in a man breaks the chains of gravity from off his feet and his hands.

The heavenly Life Force provided by the sun’s Light rays is essential to one’s health and well-being and his ability to continue life in his flesh body. Without the Life Force there would be no living elements or body forms. The earthly mineral elements and the heavenly Light rays (Atoms / vitamins) are both essential to building, creating, and sustaining all forms of Life. *They are the essential male and female aspects and elements of the creation of life forms*; they are essential to the evolution of the form and the form’s ability to remain. Without both the mineral (earth) element and the Light (heavenly) ray providing the Light (Consciousness / Mind Matter) and vitamins / vitality, there could be no expression of Life (Anti-Matter) through any kind of form.

The counterpart to “Christ” (the Light ray -- the male / man aspect) is anti-Christ (darkness -- the female / woman aspect). The Atom (Light ray / vitamin) and the mineral (fire) element are joined together by Mind / Consciousness of Infinite Wisdom, which is “God” -- and God is everywhere present. They are drawn together by the law of attraction and by the radiation of the element uranium which is the radiant fire in the body of the crystal mineral. The radiant crystal element attracts and *draws* to herself the sun’s ray (her man and soul mate), and by the Light of the sun’s ray (Atom), he attracts and *draws* to himself the element (wife) of his choosing. The two “meet in the air” (breath) where they are forever joined together by Cosmic Mind Matter (Consciousness).

Once these three meet (the element, the vitamin, and the Mind Matter), they are joined together by the “*breath in*” and they are one -- and they produce a one-cell amoeba (germ). By the “*breath out*” of Spirit (Consciousness of Mind) the germ is sent out into the magnetic field of Mind Matter (the ocean of Consciousness filled / mixed with Anti-Matter / Life) and the new life form (the germ) begins to gather to itself other elements compatible with it that are necessary to build the form according to the pattern in the “idea” of the Atom. The marriage “in the air” of the “ray” and the “element” is consummated and their bodies are solidified and *become one* by the Mind Matter (glue) in the “breath” of Life. The marriage

between the essential Life-giving and Life sustaining forces in the breath of Life will continue until the end of creation of forms in the earth.

Please read the chapter entitled “A Message From God.” This chapter describes how the earth and the elements of earth have been misused and abused by man throughout the ages.

Minerals and vitamins are the building blocks of all life forms, and without them working together there could be no forms. These are the laws of science, physics, Spirit, and chemistry (attraction) working together with Consciousness (Mind Matter) to build, create, incubate, and hatch all manner of forms of Life and life forms in the earth.

Without Spiritual Enlightenment and a Mind that is conscious of the Law and the Way of Life in the body, a man can never obtain and maintain eternal Life in his body. It is essential to life and health in the body that a balance of the earthly elements (bodies) and the heavenly Light rays (Atoms / Mind) be found and maintained. Finding and balancing the “Way of Life” in the body (in accordance with the “Law of Life”) is only possible by the work of Cosmic Mind Consciousness (Spirit and Truth), which is incorruptible, infinite Mind Wisdom and Understanding of Truth.

It is only possible to know the languages of angels and highly evolved mineral elements called “elementals” through the Mind of Spirit -- where only the living, pure Word of Truth abides. The “angels” are ministering spirits and they are *the one single eye (idea) of the Atom (Light ray)*. They live, move, and have being in heaven -- in Cosmic Mind Matter. *The angels and elementals are the children, creations, and the servants of those who attain Cosmic Mind Consciousness.* They are the intercessors between heaven (Mind) and earth (body), and they alone are capable of finding and maintaining a balance between Anti-Matter (darkness / night) and Spiritual Mind Matter (light / day). Anti-Matter is fire, and it originates and abides in darkness in the center of mother earth’s body, which is represented *in the solar plexus of a man*. But Consciousness of Wisdom and Truth and Spiritual Mind Matter abide in the sun’s Light and in the body of her rays (sons).

After the earth mother was fully formed, her body was clothed in darkness. The names of all the children that she would bear out of her body in the third dimension during this dispensation of time were spoken and foretold. The spoken Word (names) became “eggs” in her body. When the first egg in her body was fully formed, it was “time” to begin the creation of the first earthly life form; the others followed in the order that their names were first spoken (called). At this “time,” when the “egg” (Word of Wisdom) was ready to conceive the first form of Life in the body of the earth mother, the Spirit of Wisdom said, “*Let there be Light*” (*Life*), and the veil was rent from off the face of the earth! The Light of the sun and the sun’s rays descended and began to flood the earth with the heavenly Life Force, quickening the many kinds of eggs within her body, and she conceived and brought forth the first of many children.

Weddings and marriages between heaven and earth began to happen. The “egg” (Word of Wisdom) within the body of mother earth and the “seed” (Word of Knowledge) in the Atom were joined together and the two were quickened by the Life (electron) in the body of the Atom -- and the earth brought forth her first child, a mineral element. The very first child to be conceived and formed in the body of the earth was a mineral whose name was “crystal,” *whose taste or flavor became salt*. The purpose of the earth’s first born child was to grow, multiply, and increase in substance and be able to “preserve” the mother’s body and the bodies of her future children.

The Light’s rays held in their bodies vitamins that were counterparts to the elements; from A to Z they began to meet and marry (join themselves to) the minerals, and all manner of life forms began to appear inside the earth’s body. From there the bodily forms of mankind and all other kinds of earthly life forms

have evolved and developed, each in the order that *their names were first called (spoken) -- man being the last!*

The time for the harvest of all life forms in planet earth is now at hand, for the “salt” has lost her flavor. The time has come for each human form to know what kind of man he is. *Until the “butterfly” emerges from his cocoon, he cannot tell what his “appearance” will be like.* But it is certain that every kind of form, human or otherwise, will be a living composition of what began with his Father (*Adam, the man of the day*) and his Mother (*Eve, the lady of the night*). Each man will see himself as he is, the creation of his own will by the works of his own mind.

The question is, “What manner of man are you?” When the last trumpet sounds and it sounds so loud that it shatters the crystal-salt cocoon from around *the man behind the glass (green) door*, what manner of creation and form will be revealed? The answer is found in two more questions: “***What is your native tongue, and what other languages do you understand and speak?***” The answer to these last two questions will tell you *who* and *what* you are! Will there be a “revelation / revealing” of a pillar of salt that has lost its flavor? Will the revelation show forth a “bitter root” of unforgiveness, envy, and strife? Will it show forth a glass of fermented, sour wine (fruit of the vine)? Or will you “see” and taste the sweetness that is sweeter than the honey in the honeycomb?

“Salt” represents the Dead Sea scrolls, i.e., the spirits of dead men’s flesh. A “bitter” root comes from unforgiveness, envy, and strife. “Sour” represents the “spirit of Babylon,” the false church -- the “wine” from sour grapes (spoiled fruit, dead on the vine). And “sweetness” (the honey in the honeycomb) represents one’s reward for his untiring labor of love in the midst of extreme adversity, *always trusting in Him whom he has not “seen,” yet “looking” always for Him to “manifest” Himself.* How “sweet” will be the “sight” when we shall ***BEHOLD “HIM” -- ONE’S OWN TRUE SELF!***
